

MODERN OPERATING SYSTEMS

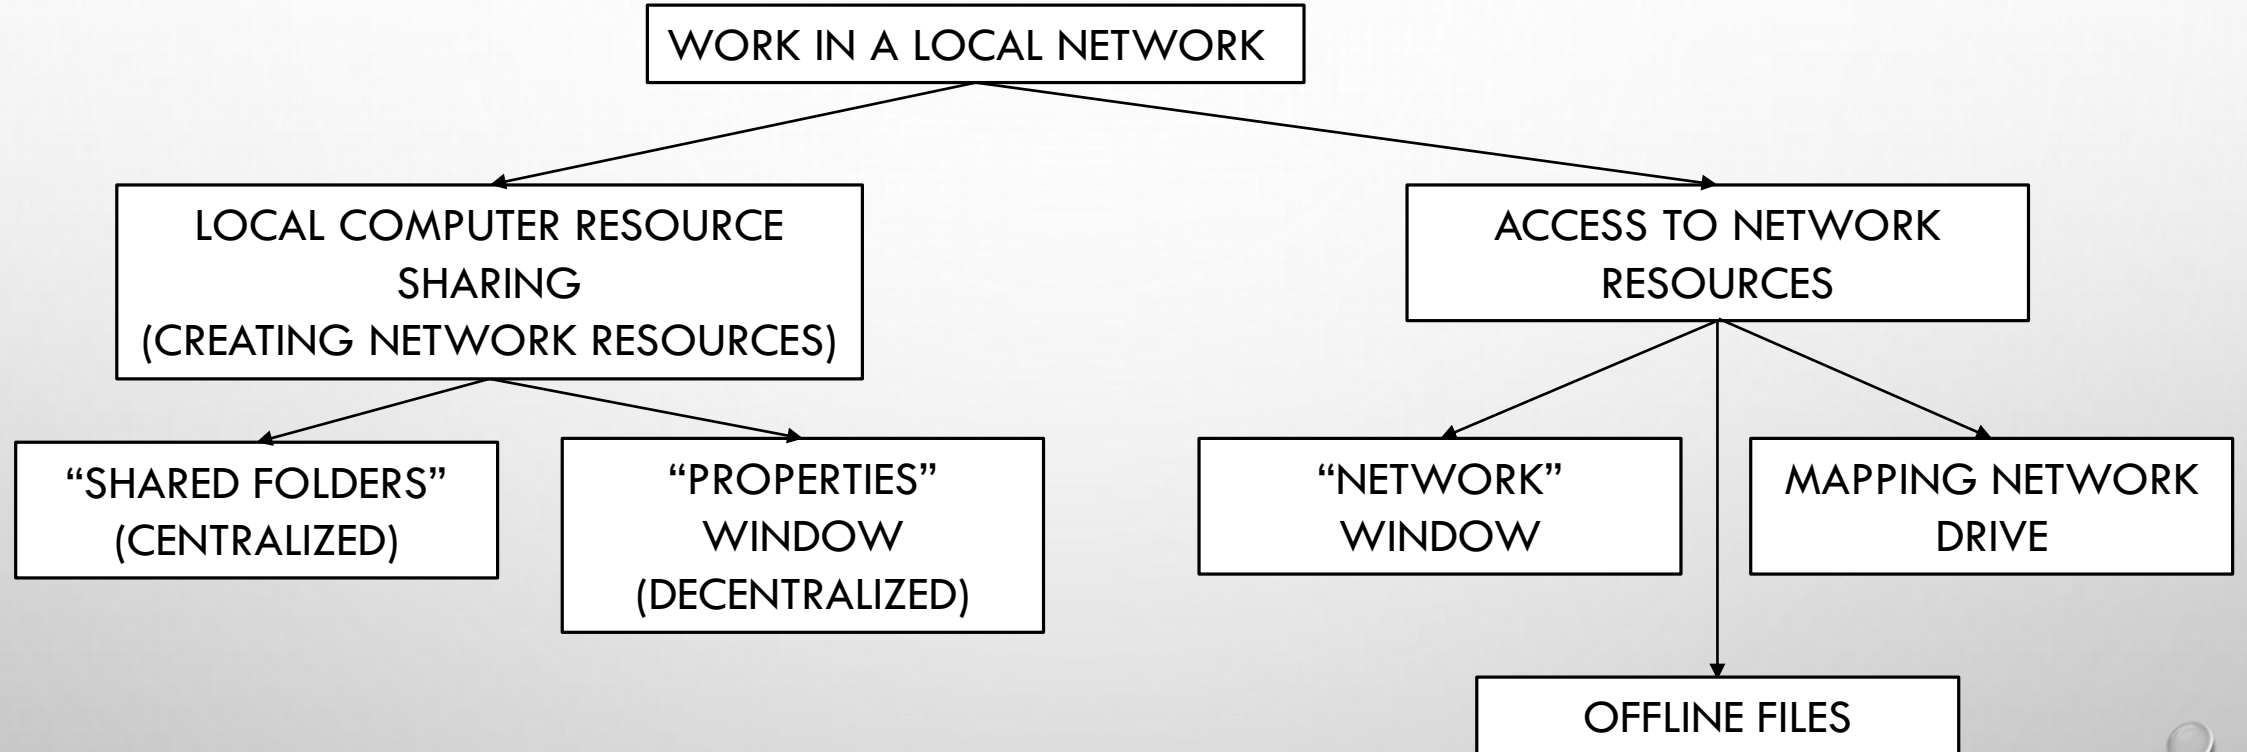

LECTURE 8

AUTHOR: DR. ZVEREVA OLGA M.

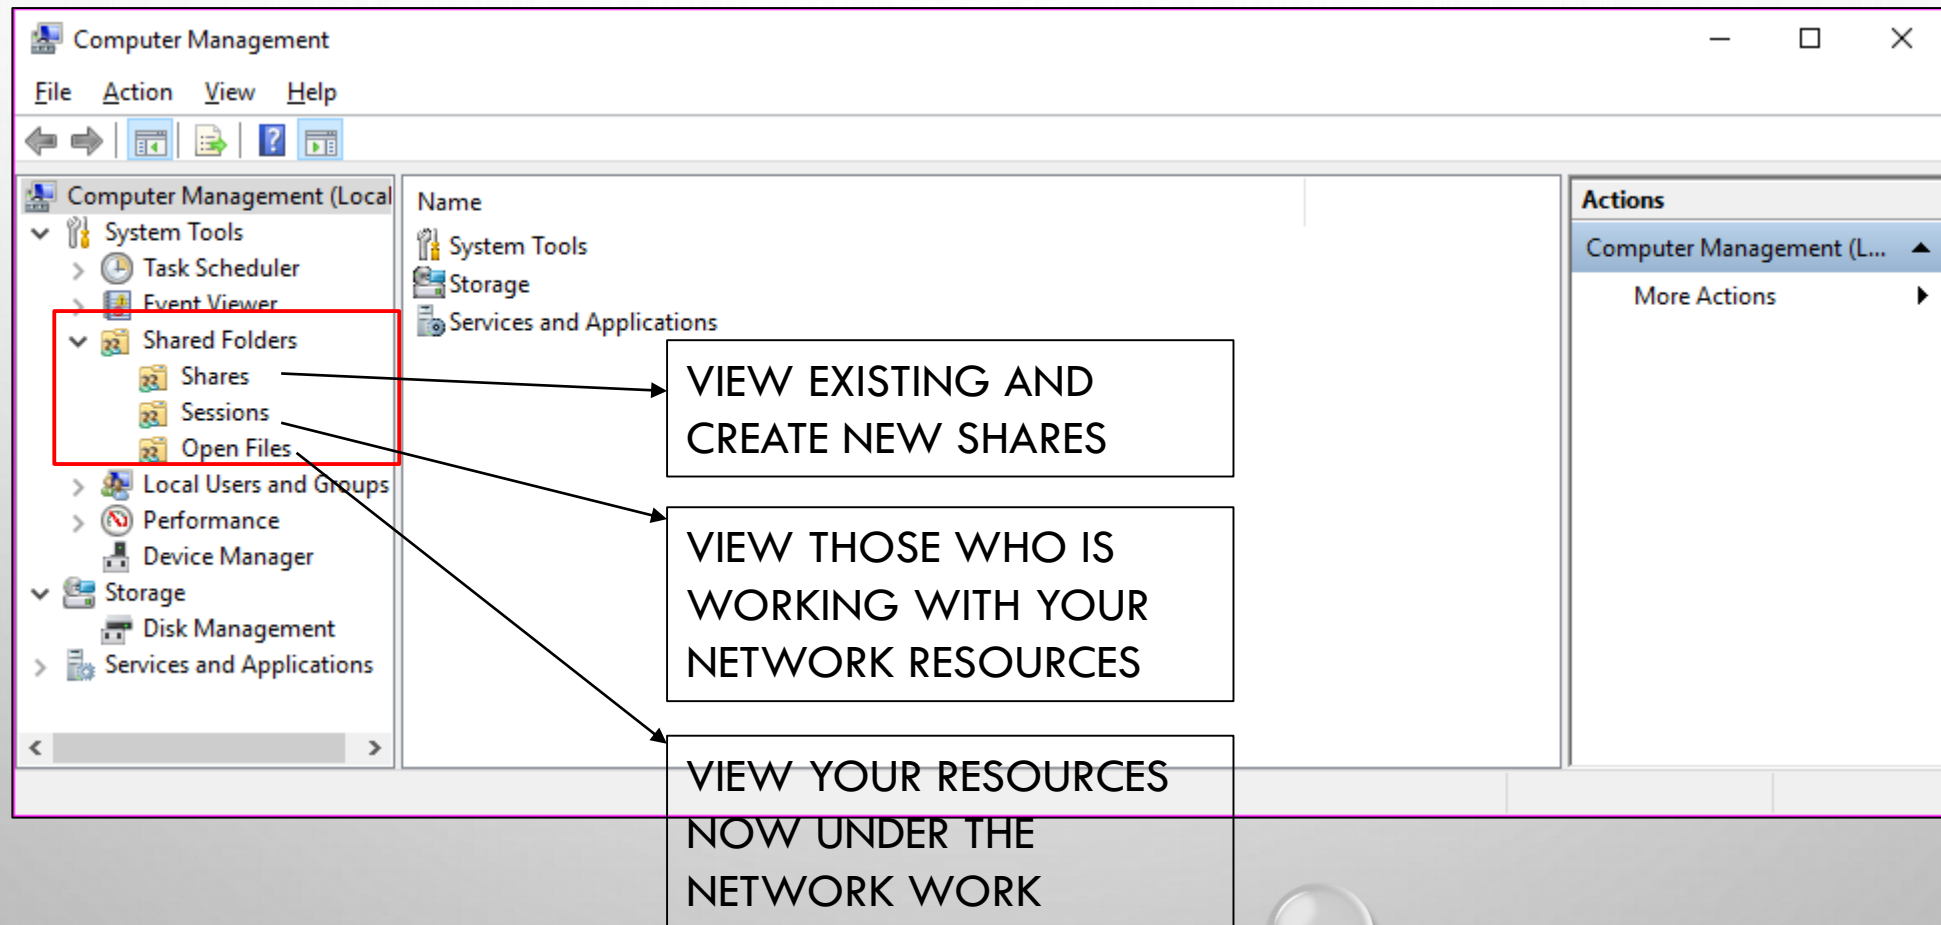

AGENDA

- ✓ NETWORKING
- ✓ PRACTICE TASK

NETWORKING

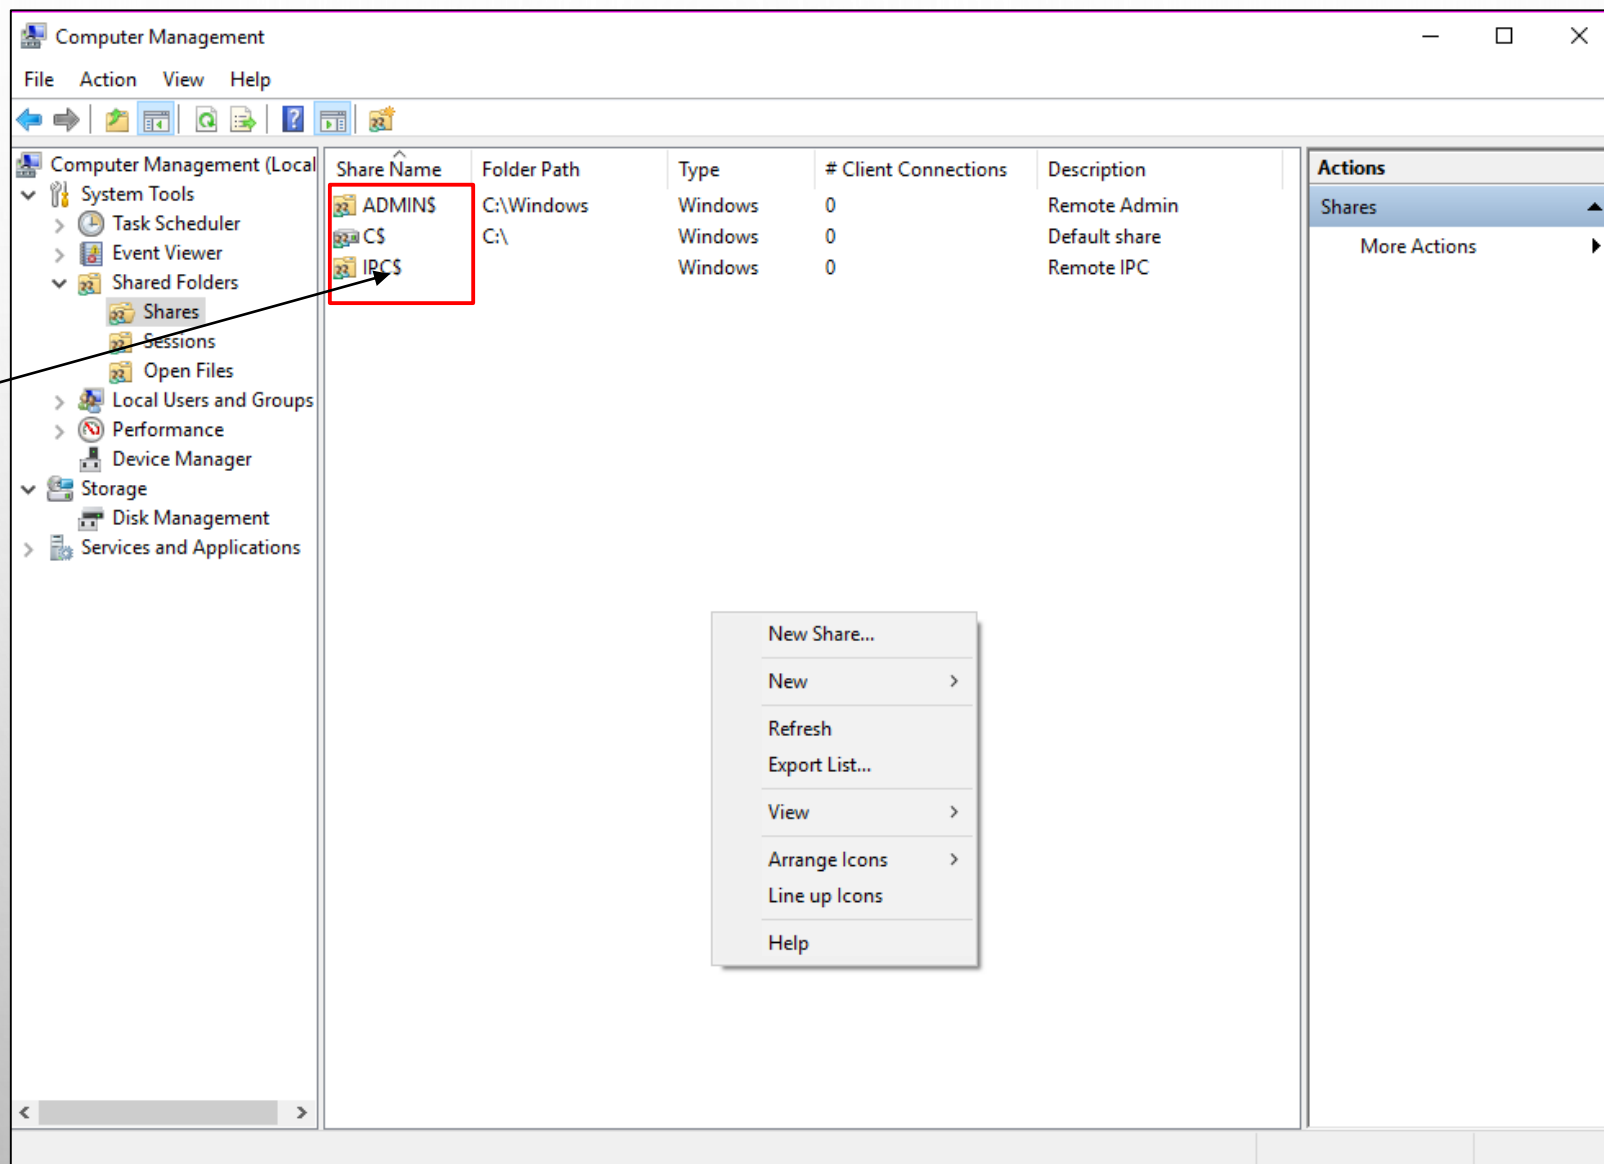

SHARED FOLDERS: CENTRALIZED RESOURCE SHARING

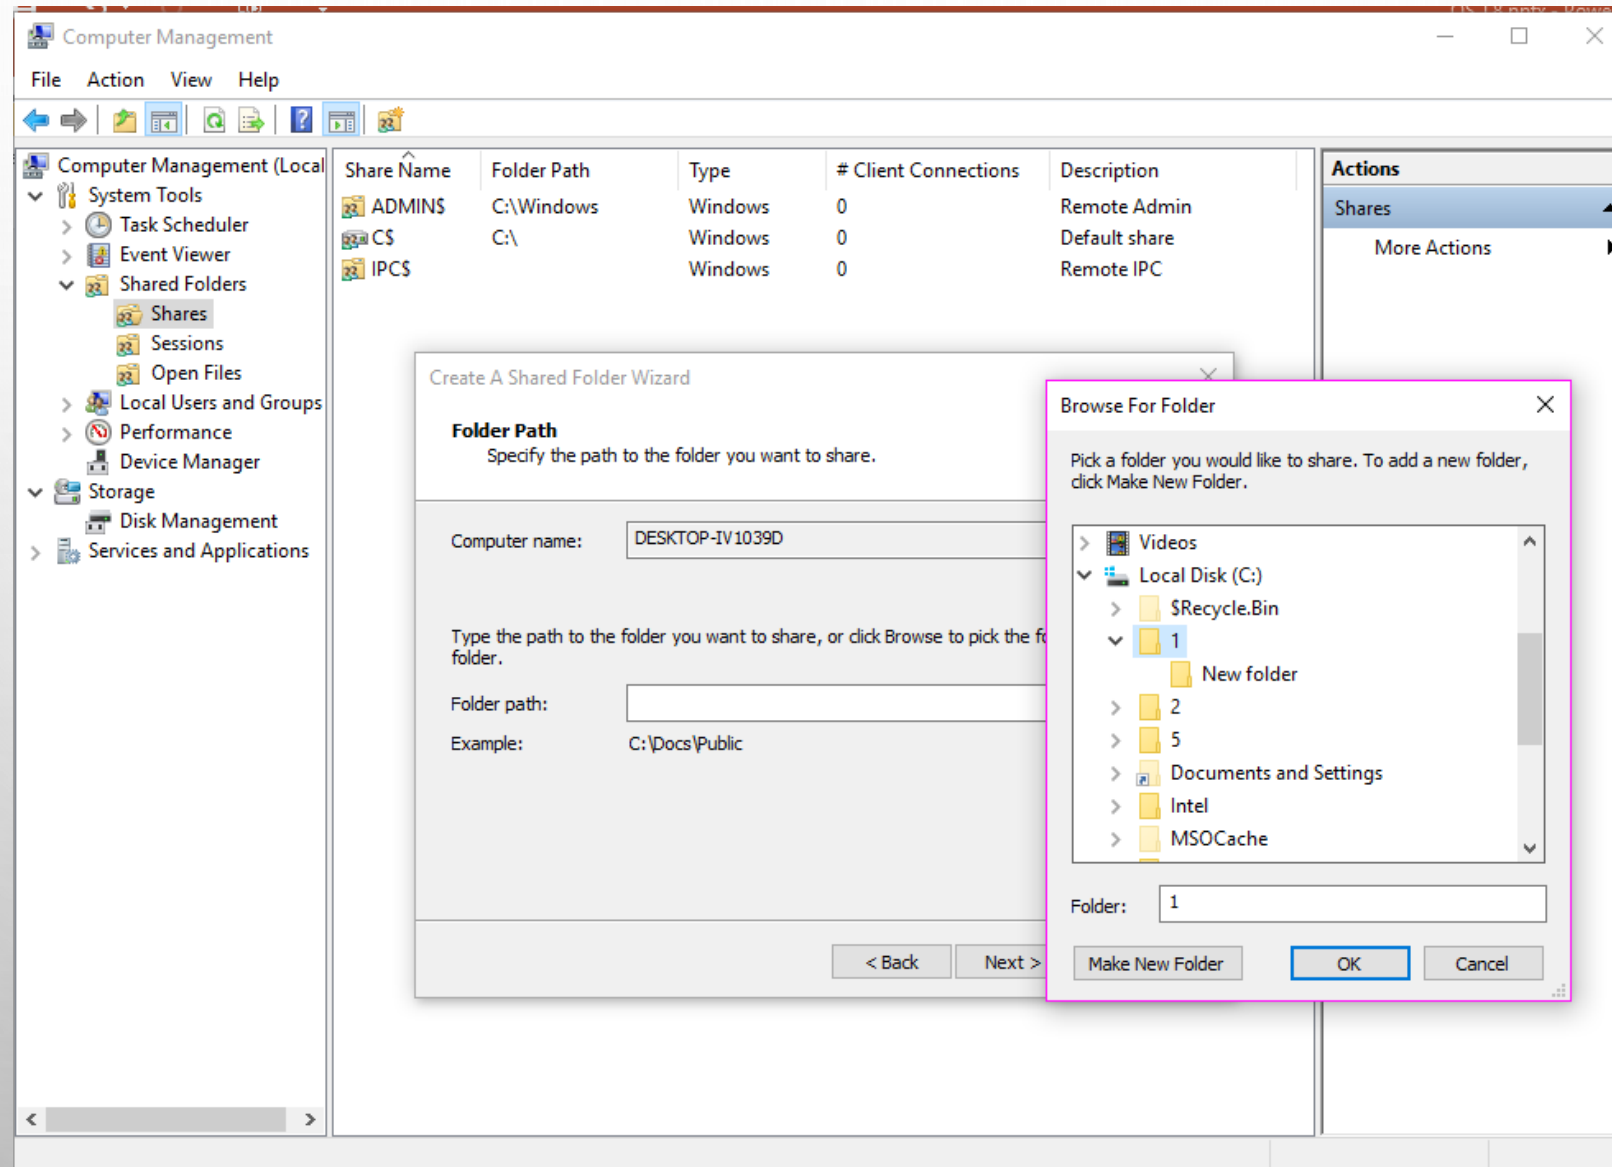

NEW SHARE

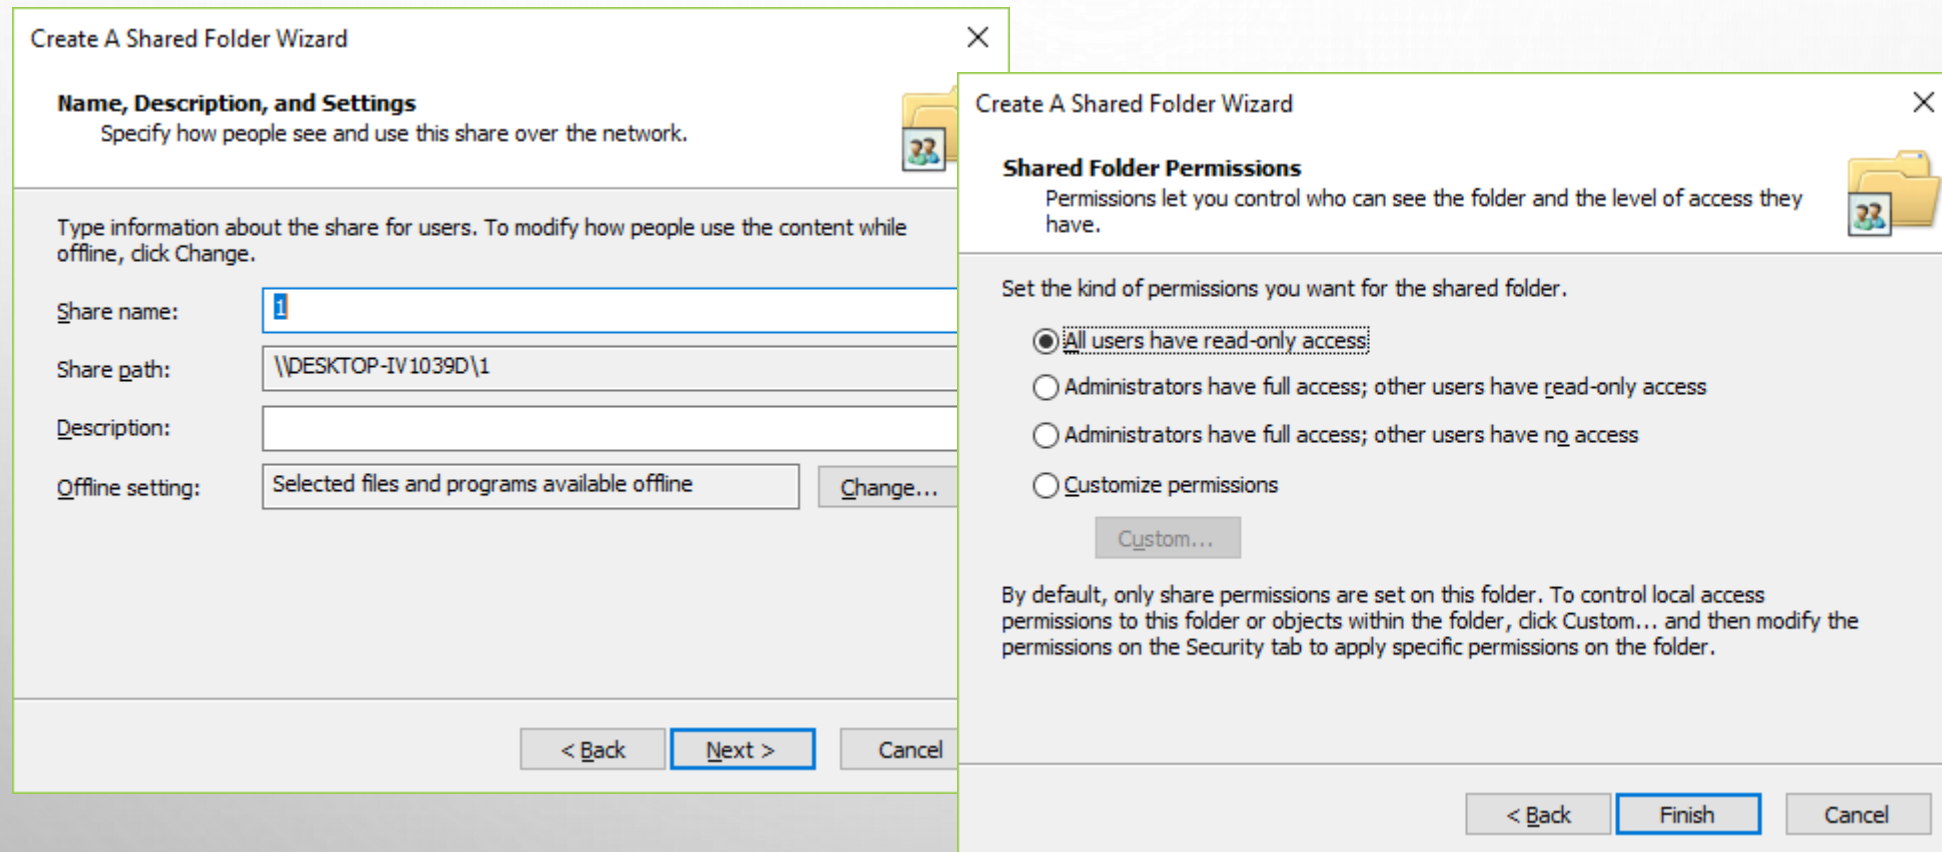

Name with the ending symbol “\$” makes this shared folder invisible in graphical interface

NEW SHARE

NETWORK PERMISSIONS

Create A Shared Folder Wizard

Name, Description, and Settings
Specify how people see and use this share over the network.

Type information about the share for users. To modify how people use the content while offline, click Change.

Share name: 1

Share path: \\DESKTOP-IV1039D\1

Description:

Offline setting: Selected files and programs available offline Change...

< Back Next > Cancel

Create A Shared Folder Wizard

Shared Folder Permissions
Permissions let you control who can see the folder and the level of access they have.

Set the kind of permissions you want for the shared folder.

☒ All users have read-only access

☐ Administrators have full access; other users have read-only access

☐ Administrators have full access; other users have no access

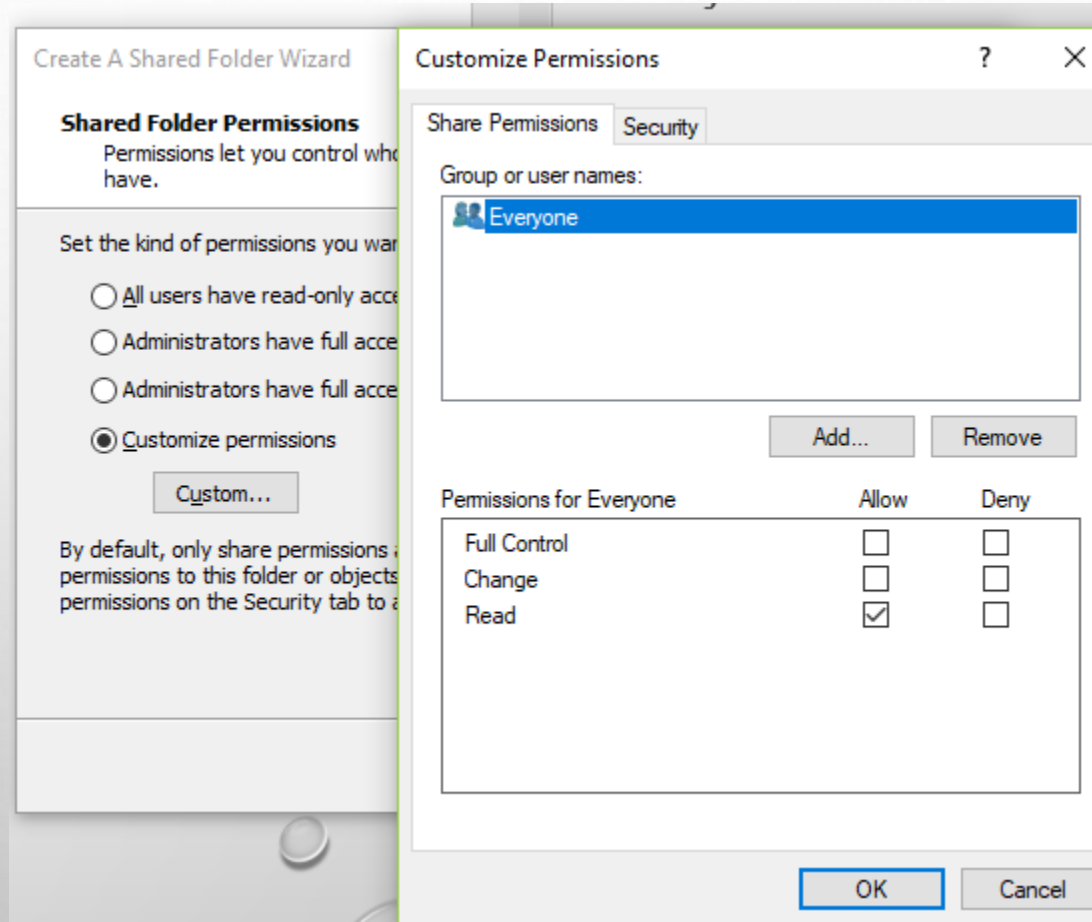

☐ Customize permissions

Custom...

By default, only share permissions are set on this folder. To control local access permissions to this folder or objects within the folder, click Custom... and then modify the permissions on the Security tab to apply specific permissions on the folder.

< Back Finish Cancel

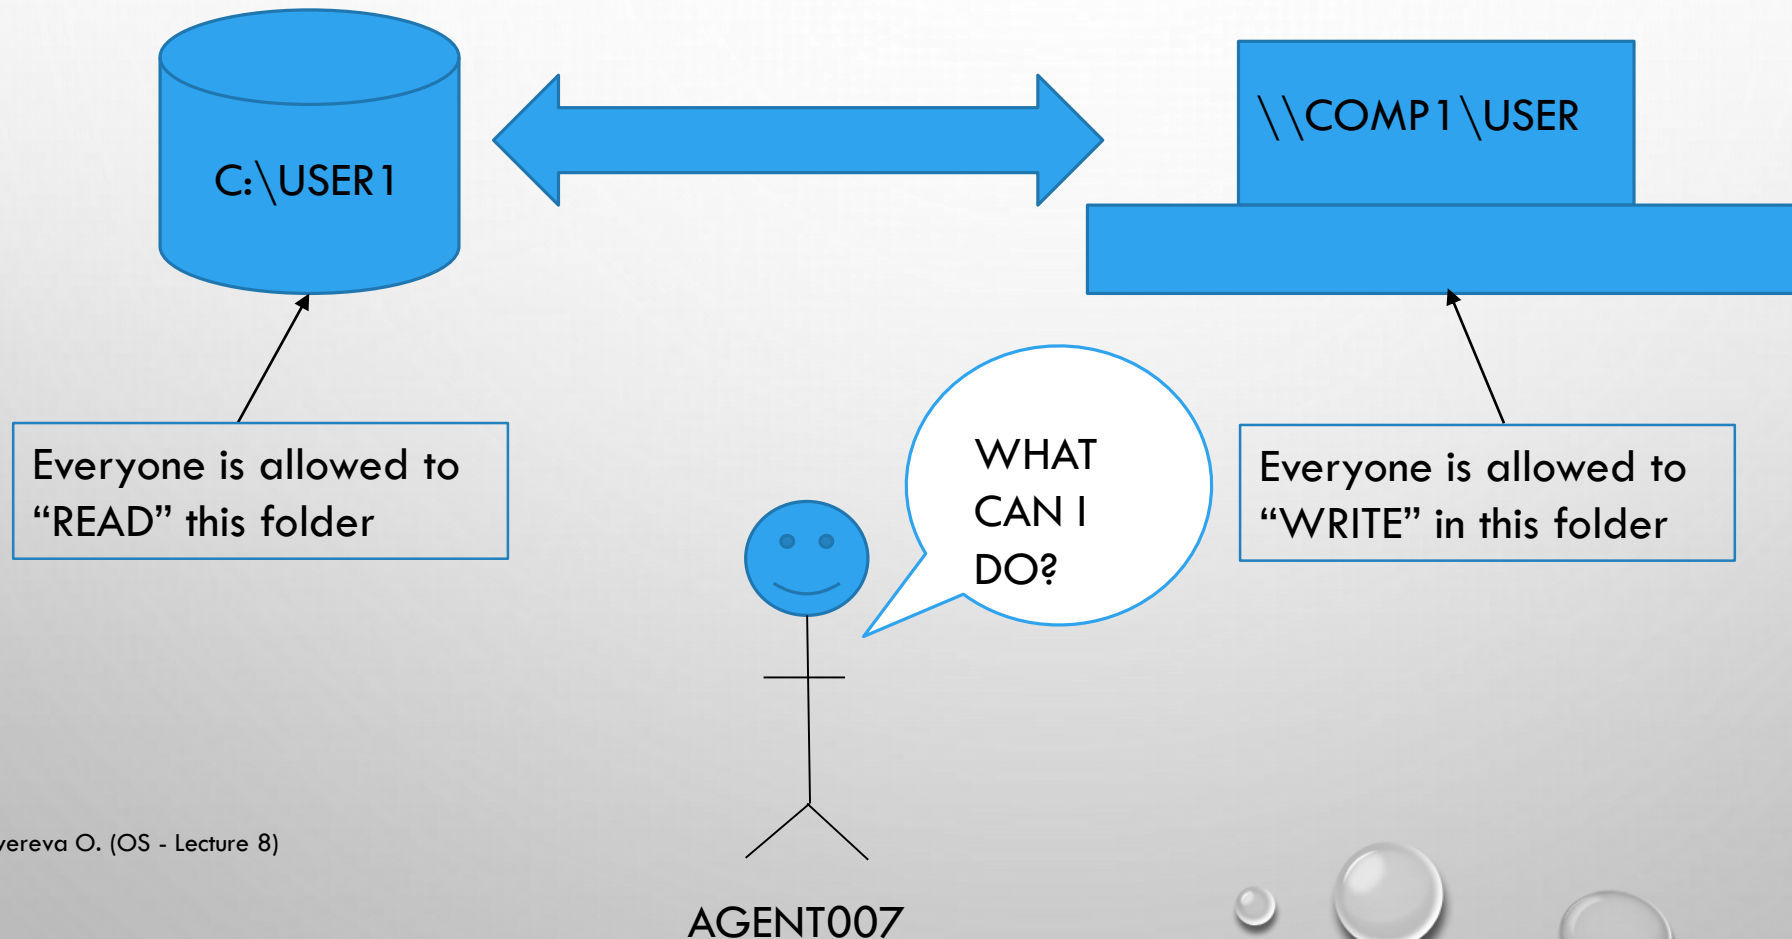

CUSTOMIZED PERMISSIONS

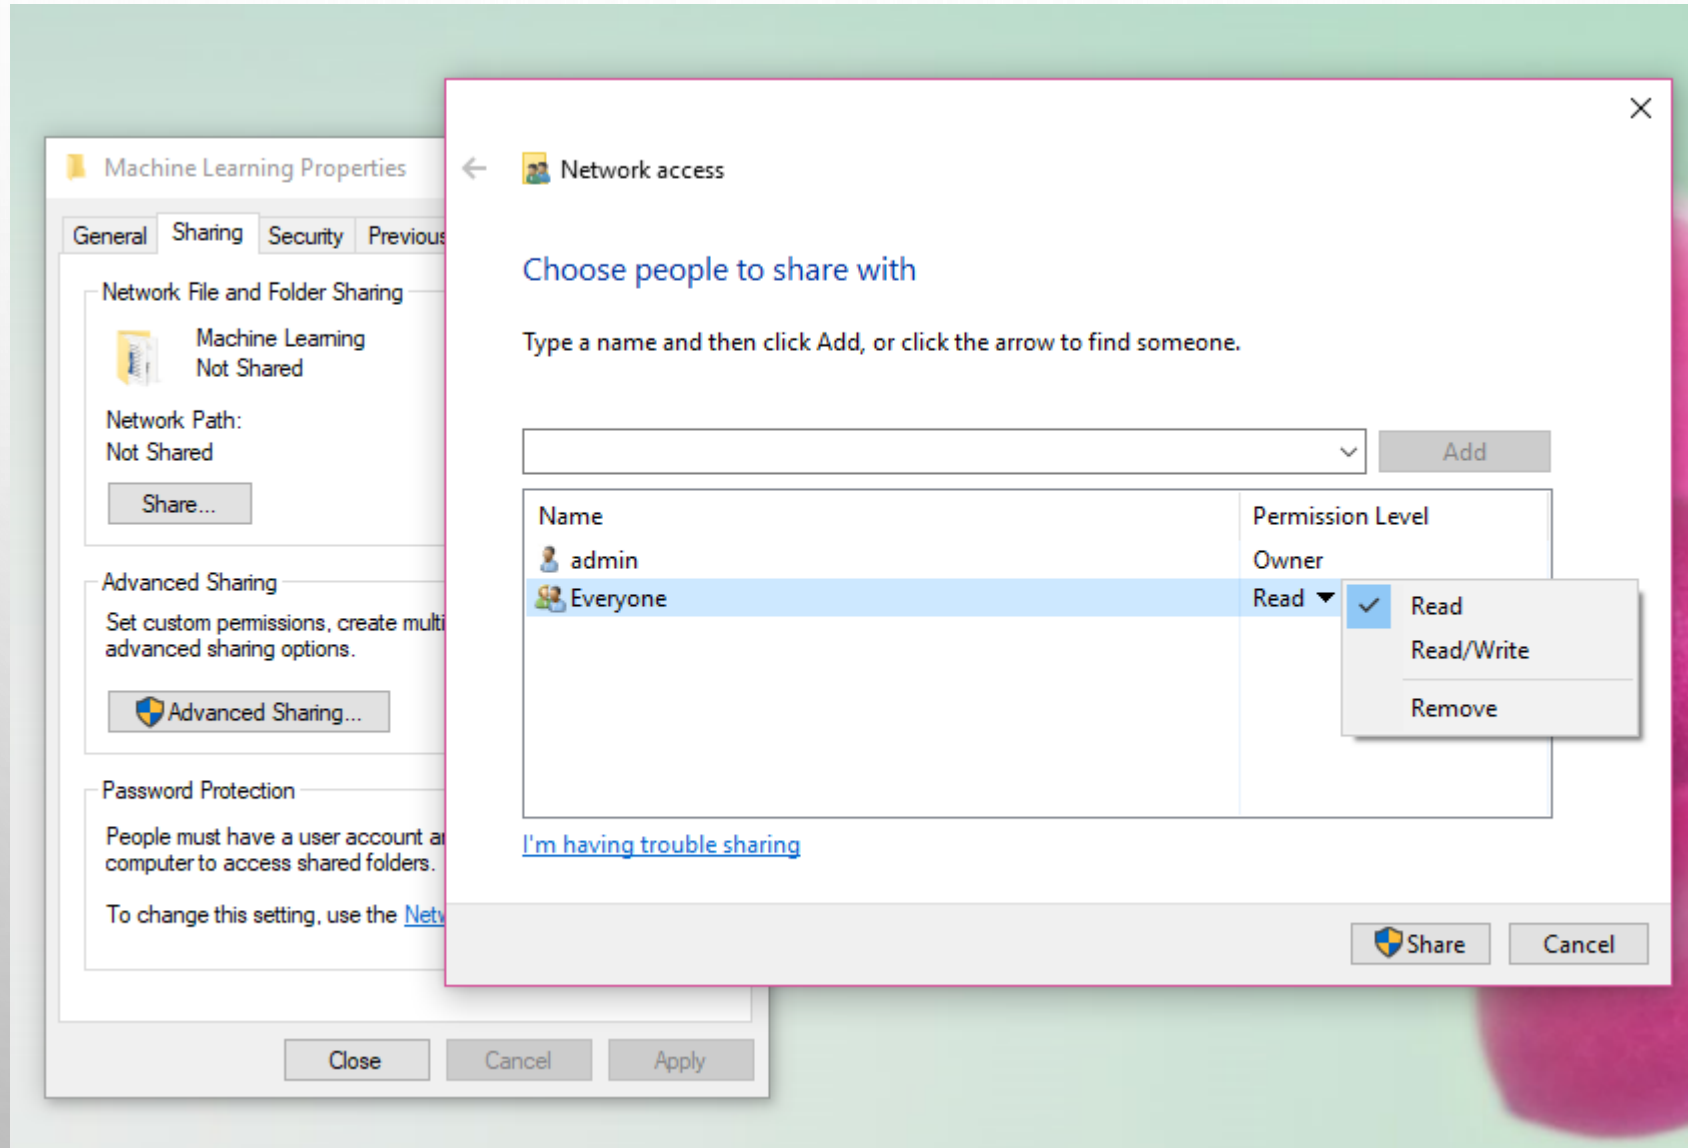

RULE OF LOCAL AND NETWORK PERMISSIONS INTERACTION

LOCAL AND NETWORK PERMISSIONS ARE MULTIPLIED: IT MEANS THAT TO BE ABLE TO MANIPULATE WITH THE FILE/FOLDER IN THE PARTICULAR WAY (I.E. READ, WRITE, AND ETC.), IT IS NECESSARY TO HAVE THIS PERMISSION (AS “ALLOW” THIS ACTION) IN THE LOCAL PERMISSION SET, AND IN THE NETWORK SET AS WELL.

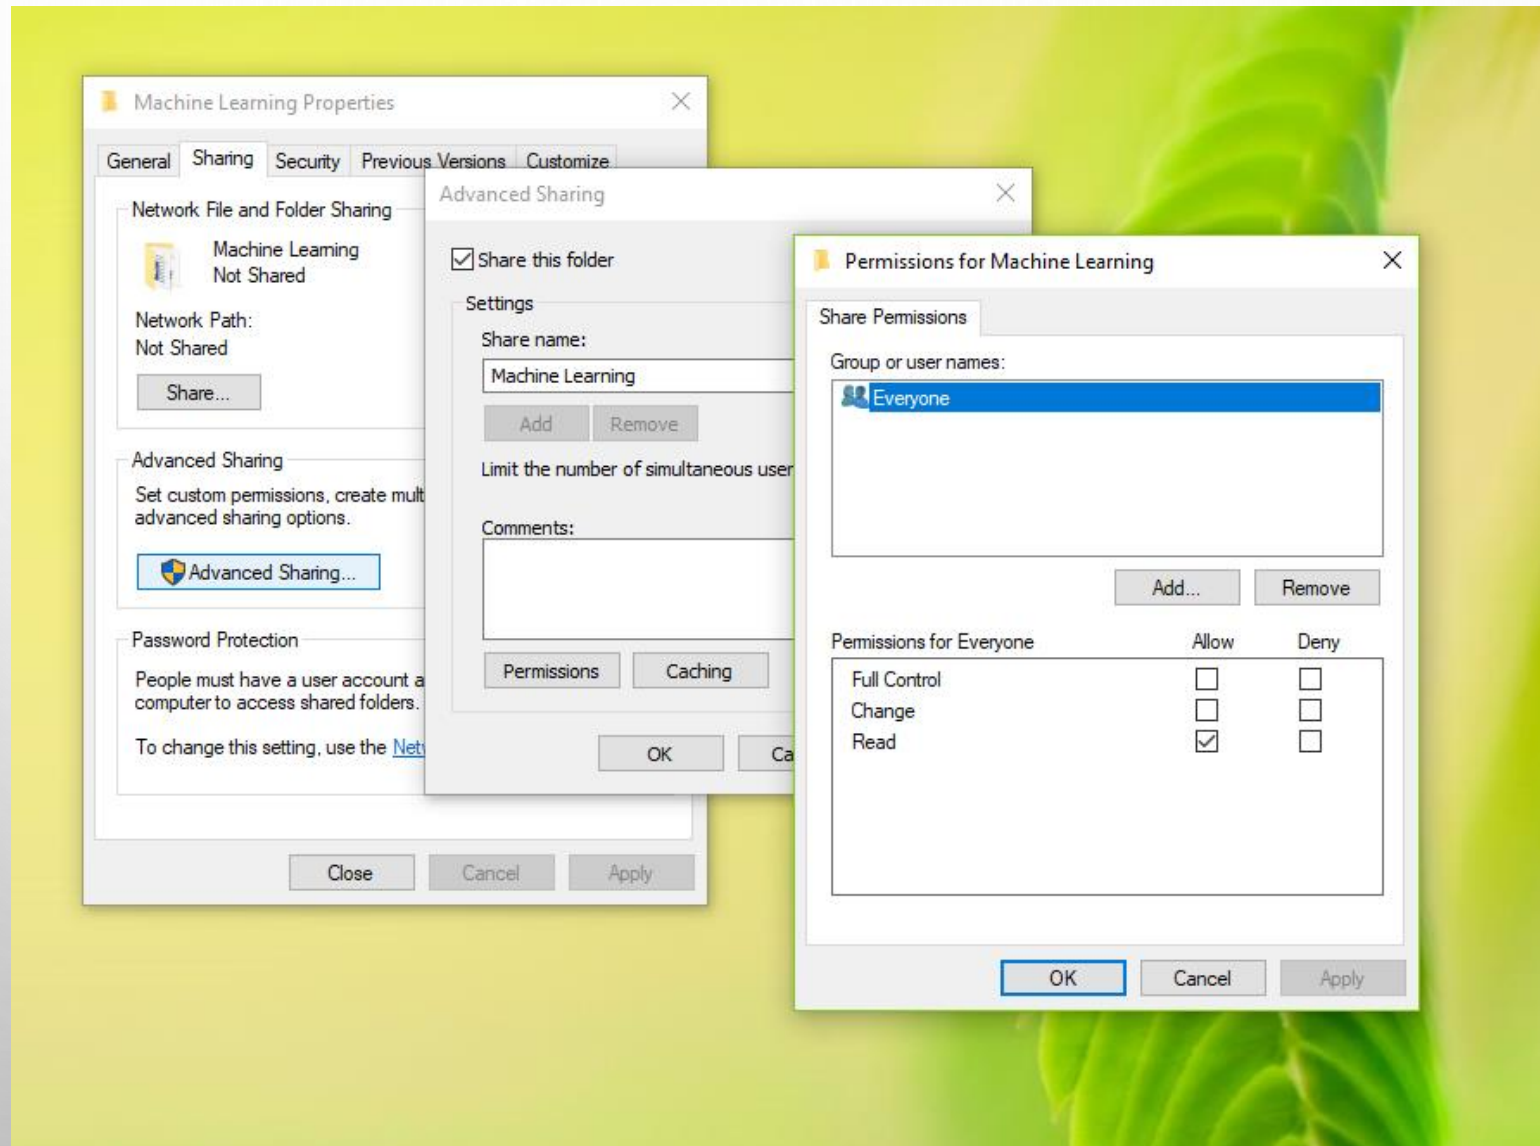

“DANGEROUS” SITUATION

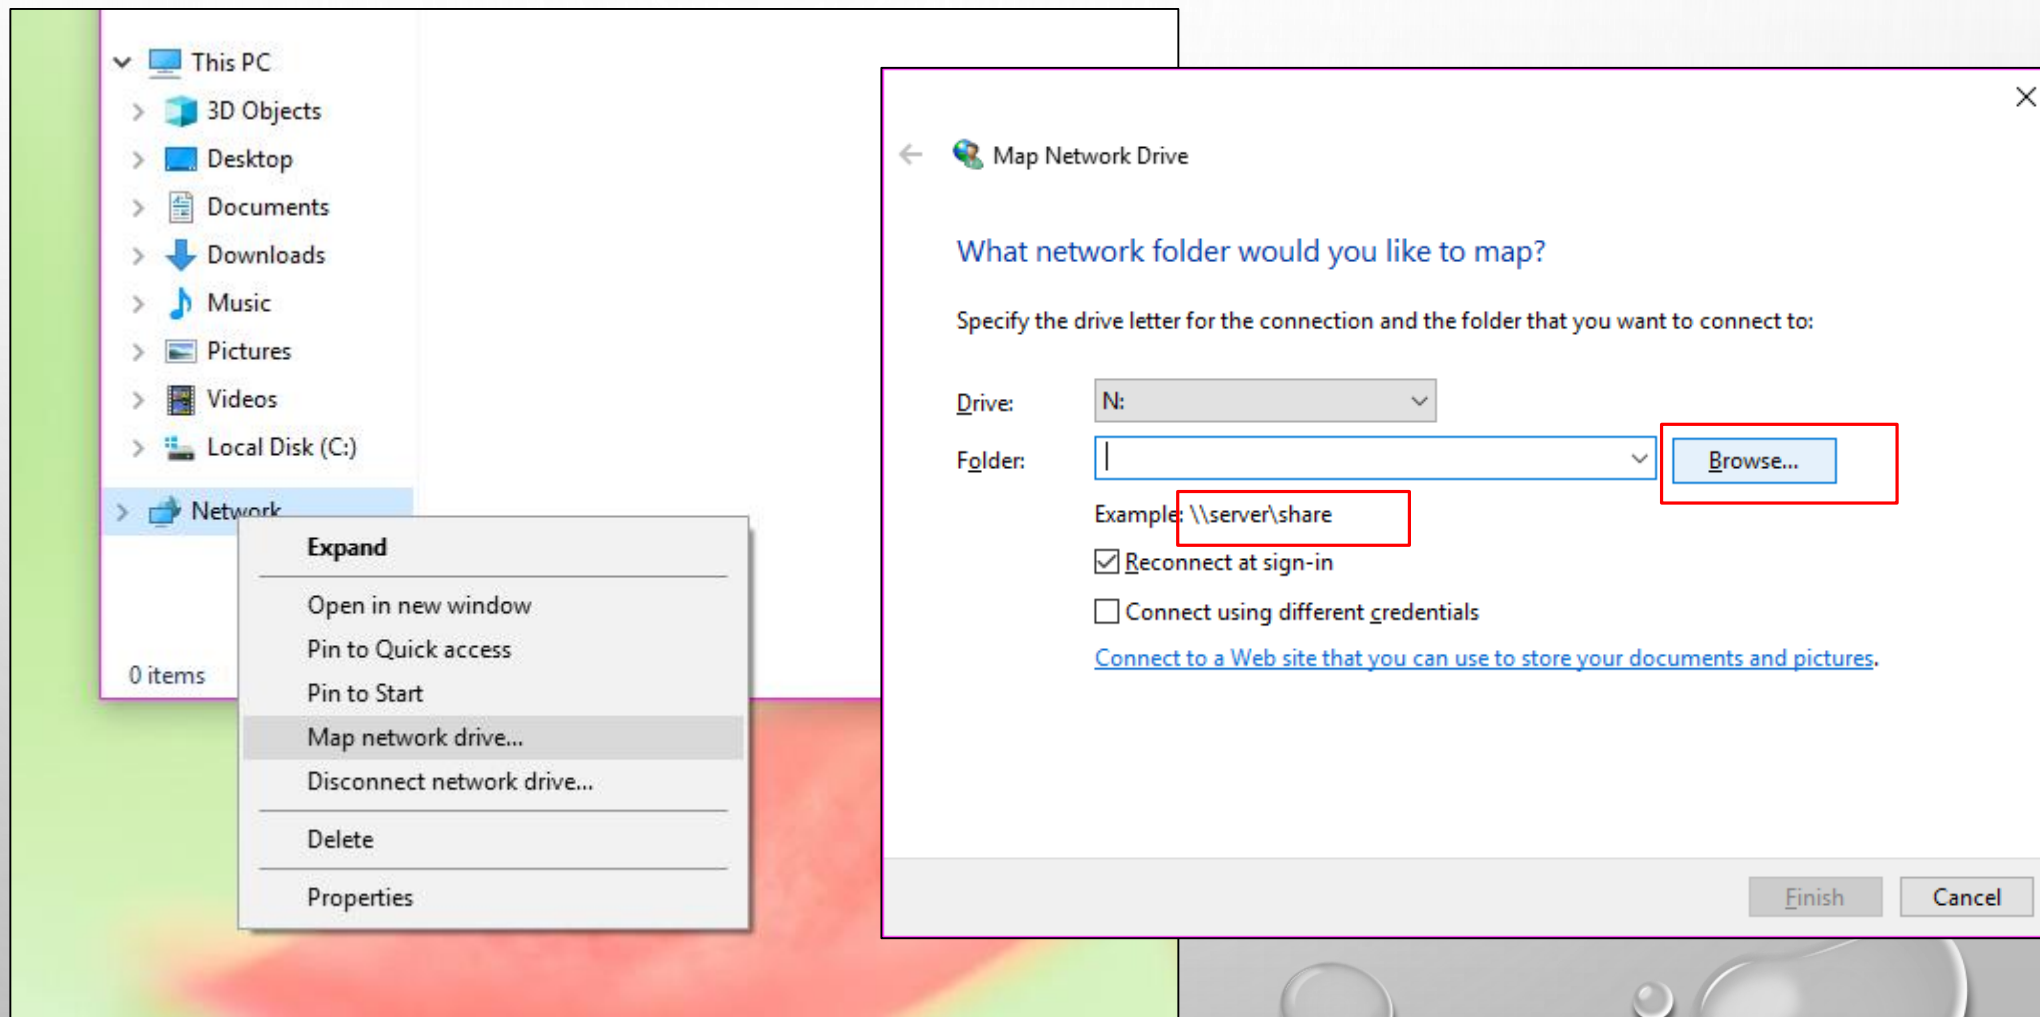

DECENTRALIZED SHARING: SHARING\SHARE (ONLY FOR FOLDERS!)

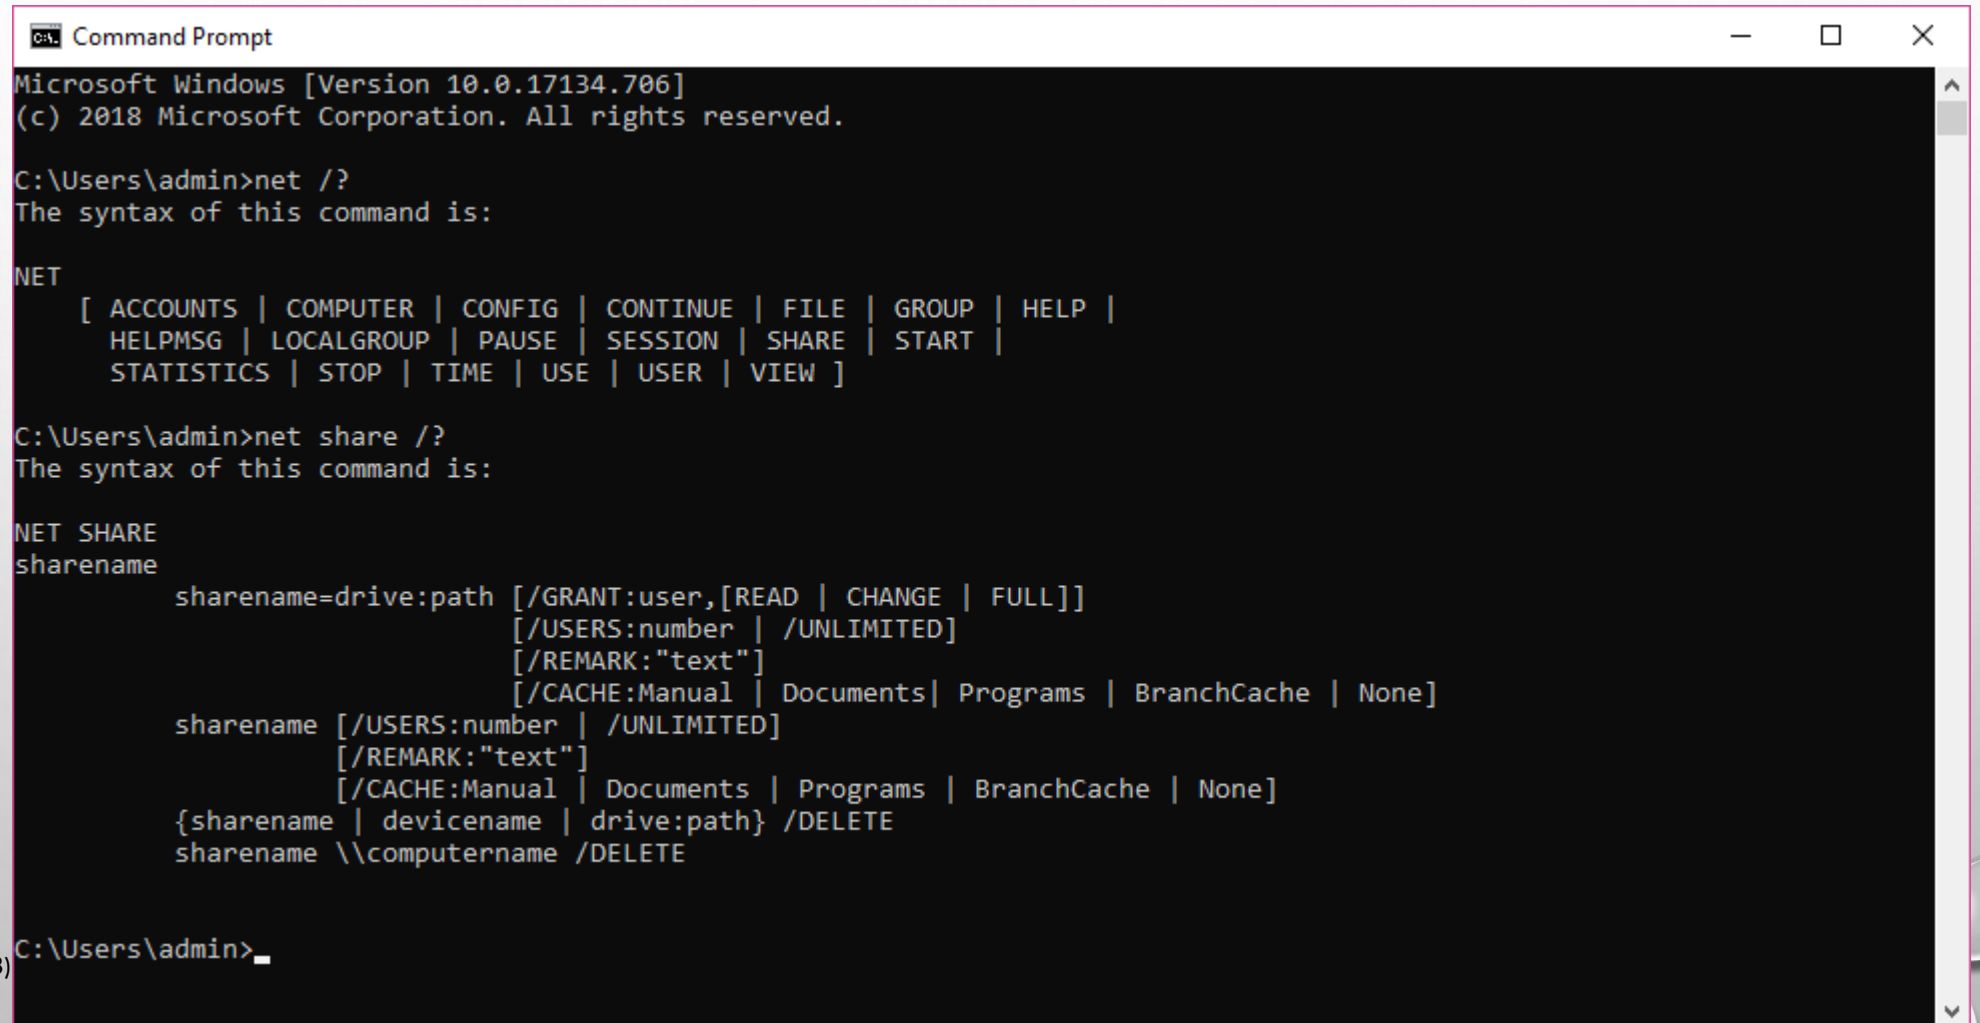

DECENTRALIZED SHARING: SHARING\ADVANCED SHARING

NETWORK DRIVE -> NETWORK RESOURCE WILL BE SHOWN AS A LOGICAL DISK IN YOUR COMPUTER

USEFUL COMMANDS FOR NETWORKING: NET COMMANDS

```
Command Prompt
Microsoft Windows [Version 10.0.17134.706]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\admin>net /?
The syntax of this command is:

NET
    [ ACCOUNTS | COMPUTER | CONFIG | CONTINUE | FILE | GROUP | HELP |
      HELPMMSG | LOCALGROUP | PAUSE | SESSION | SHARE | START |
      STATISTICS | STOP | TIME | USE | USER | VIEW ]

C:\Users\admin>net share /?
The syntax of this command is:

NET SHARE
sharename
    sharename=drive:path [/GRANT:user,[READ | CHANGE | FULL]]
                        [/USERS:number | /UNLIMITED]
                        [/REMARK:"text"]
                        [/CACHE:Manual | Documents | Programs | BranchCache | None]
    sharename [/USERS:number | /UNLIMITED]
              [/REMARK:"text"]
              [/CACHE:Manual | Documents | Programs | BranchCache | None]
    {sharename | devicename | drive:path} /DELETE
    sharename \\computername /DELETE

C:\Users\admin>
```

NET SHARE: SHARING YOUR RESOURCES

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.17134.706]
(c) 2018 Microsoft Corporation. All rights reserved.

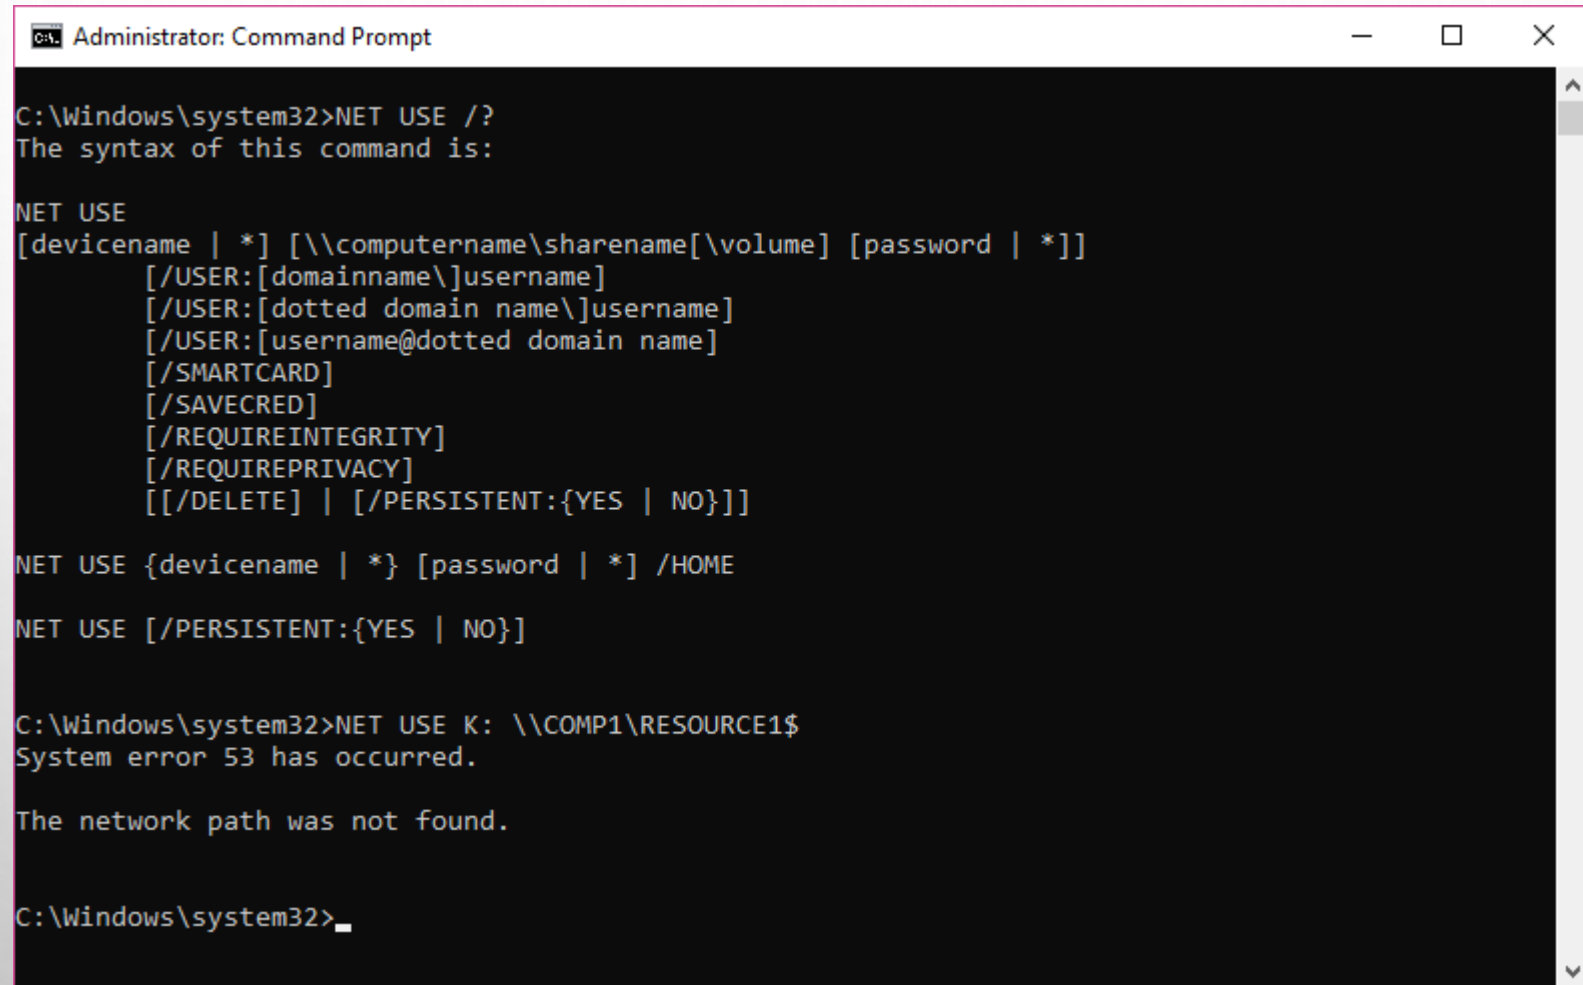

C:\Windows\system32>NET SHARE USERS_COMP=C:\USERS
USERS_COMP was shared successfully.

C:\Windows\system32>NET SHARE

Share name    Resource          Remark
-----
C$            C:\              Default share
IPC$          Remote IPC
ADMIN$        C:\Windows       Remote Admin
USERS_COMP    C:\USERS
The command completed successfully.

C:\Windows\system32>_
```

NET USE: MAPPING A NETWORK DRIVE

```
Administrator: Command Prompt

C:\Windows\system32>NET USE /?
The syntax of this command is:

NET USE
[devicename | *] [\\computername\sharename[\volume] [password | *]]
    [/USER:[domainname\]username]
    [/USER:[dotted domain name\]username]
    [/USER:[username@dotted domain name]
    [/SMARTCARD]
    [/SAVECRED]
    [/REQUIREINTEGRITY]
    [/REQUIREPRIVACY]
    [[/DELETE] | [/PERSISTENT:{YES | NO}]]

NET USE {devicename | *} [password | *] /HOME

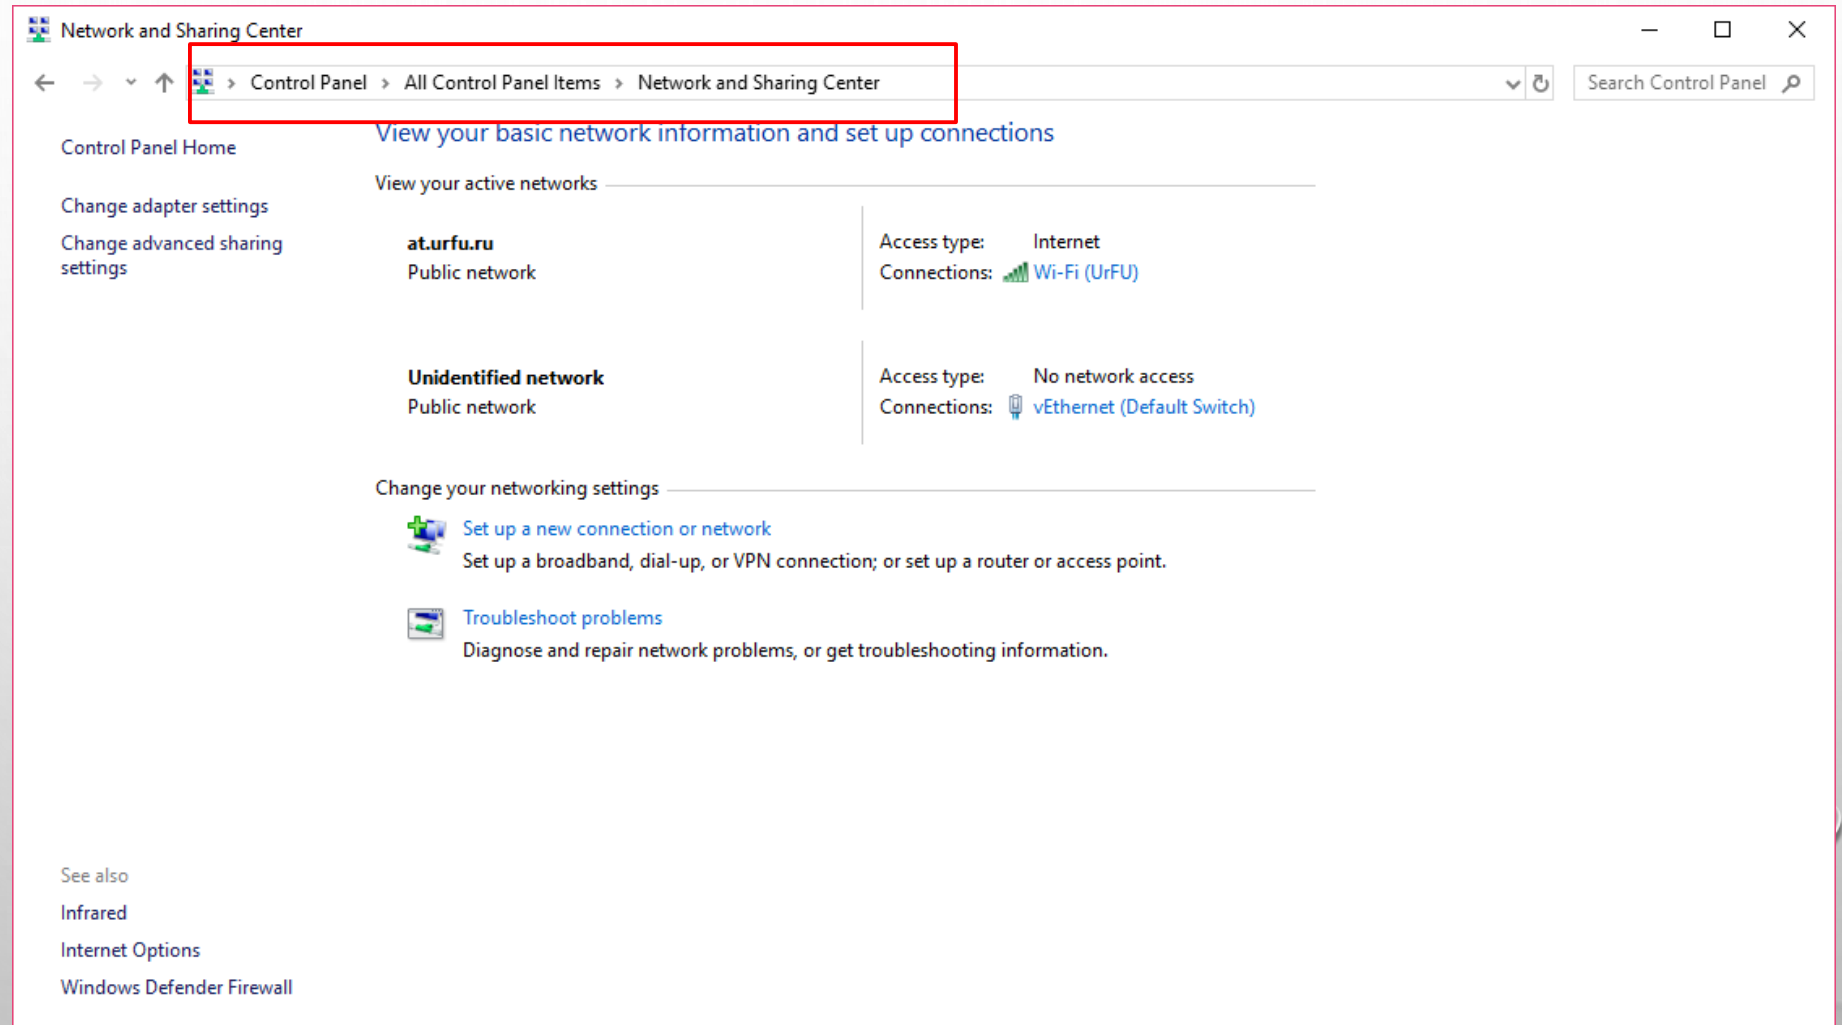

NET USE [/PERSISTENT:{YES | NO}]

C:\Windows\system32>NET USE K: \\COMP1\RESOURCE1$
System error 53 has occurred.

The network path was not found.

C:\Windows\system32>_
```

NETWORK AND SHARING CENTER

WHAT IS A NETWORK LOCATION?

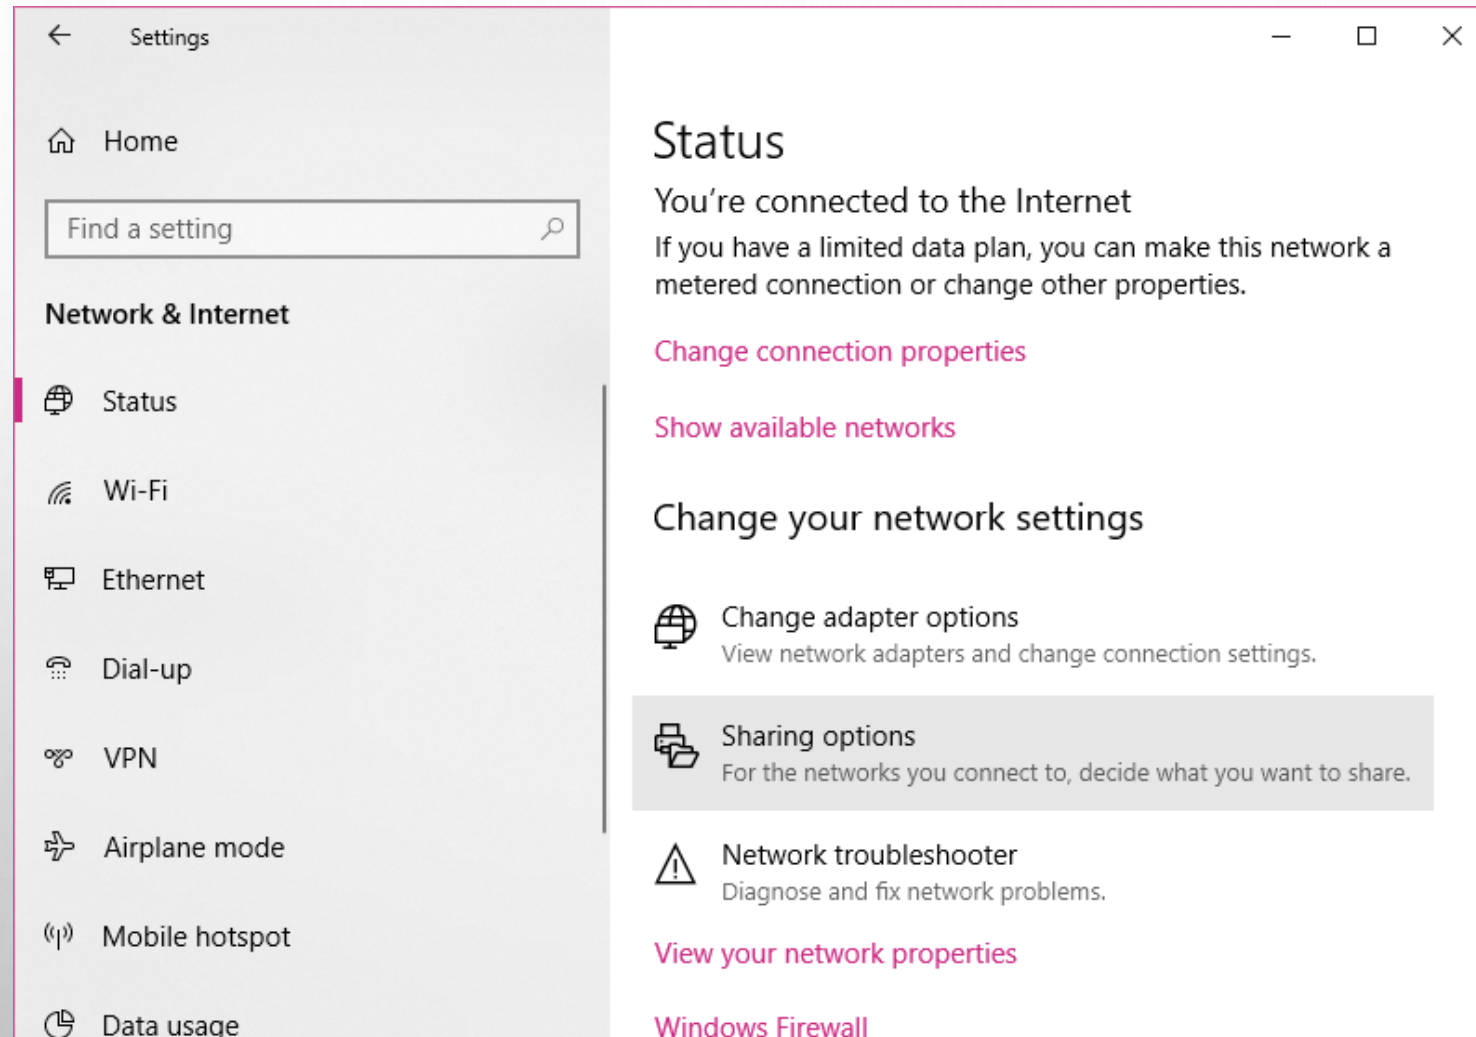

- A NETWORK LOCATION IS A PROFILE THAT INCLUDES A COLLECTION OF NETWORK AND SHARING SETTINGS THAT GET APPLIED TO THE NETWORK YOU ARE CONNECTED TO.
- BASED ON THE NETWORK LOCATION ASSIGNED TO YOUR ACTIVE NETWORK CONNECTION, FEATURES SUCH AS FILE AND PRINTER SHARING, NETWORK DISCOVERY AND OTHERS MIGHT BE ENABLED OR DISABLED.
- THESE NETWORK LOCATIONS (OR PROFILES, IF YOU WOULD LIKE TO CALL THEM THAT) ARE USEFUL TO PEOPLE WHO ARE VERY MOBILE AND CONNECT THEIR WINDOWS COMPUTERS AND DEVICES TO MANY NETWORKS. (FOR EXAMPLE, YOU COULD USE YOUR WORK LAPTOP TO CONNECT TO YOUR COMPANY NETWORK, TAKE IT HOME AT THE END OF THE DAY, CONNECT TO YOUR HOME NETWORK AND, DURING THE WEEKEND, TRAVEL AND CONNECT TO FREE WI-FI NETWORKS IN HOTELS AND AIRPORTS).
- EACH TIME YOU CONNECT TO A NEW NETWORK, WINDOWS ASKS YOU WHETHER YOU WANT TO MAKE YOUR COMPUTER DISCOVERABLE ON THE NETWORK.

NETWORK LOCATIONS IN WINDOWS 10 / WINDOWS 8.1: PRIVATE VS PUBLIC

WINDOWS 10/8.1 SIMPLIFIES THE CONCEPT OF NETWORK LOCATIONS, REDUCING THEM TO ONLY TWO (THREE) CHOICES:

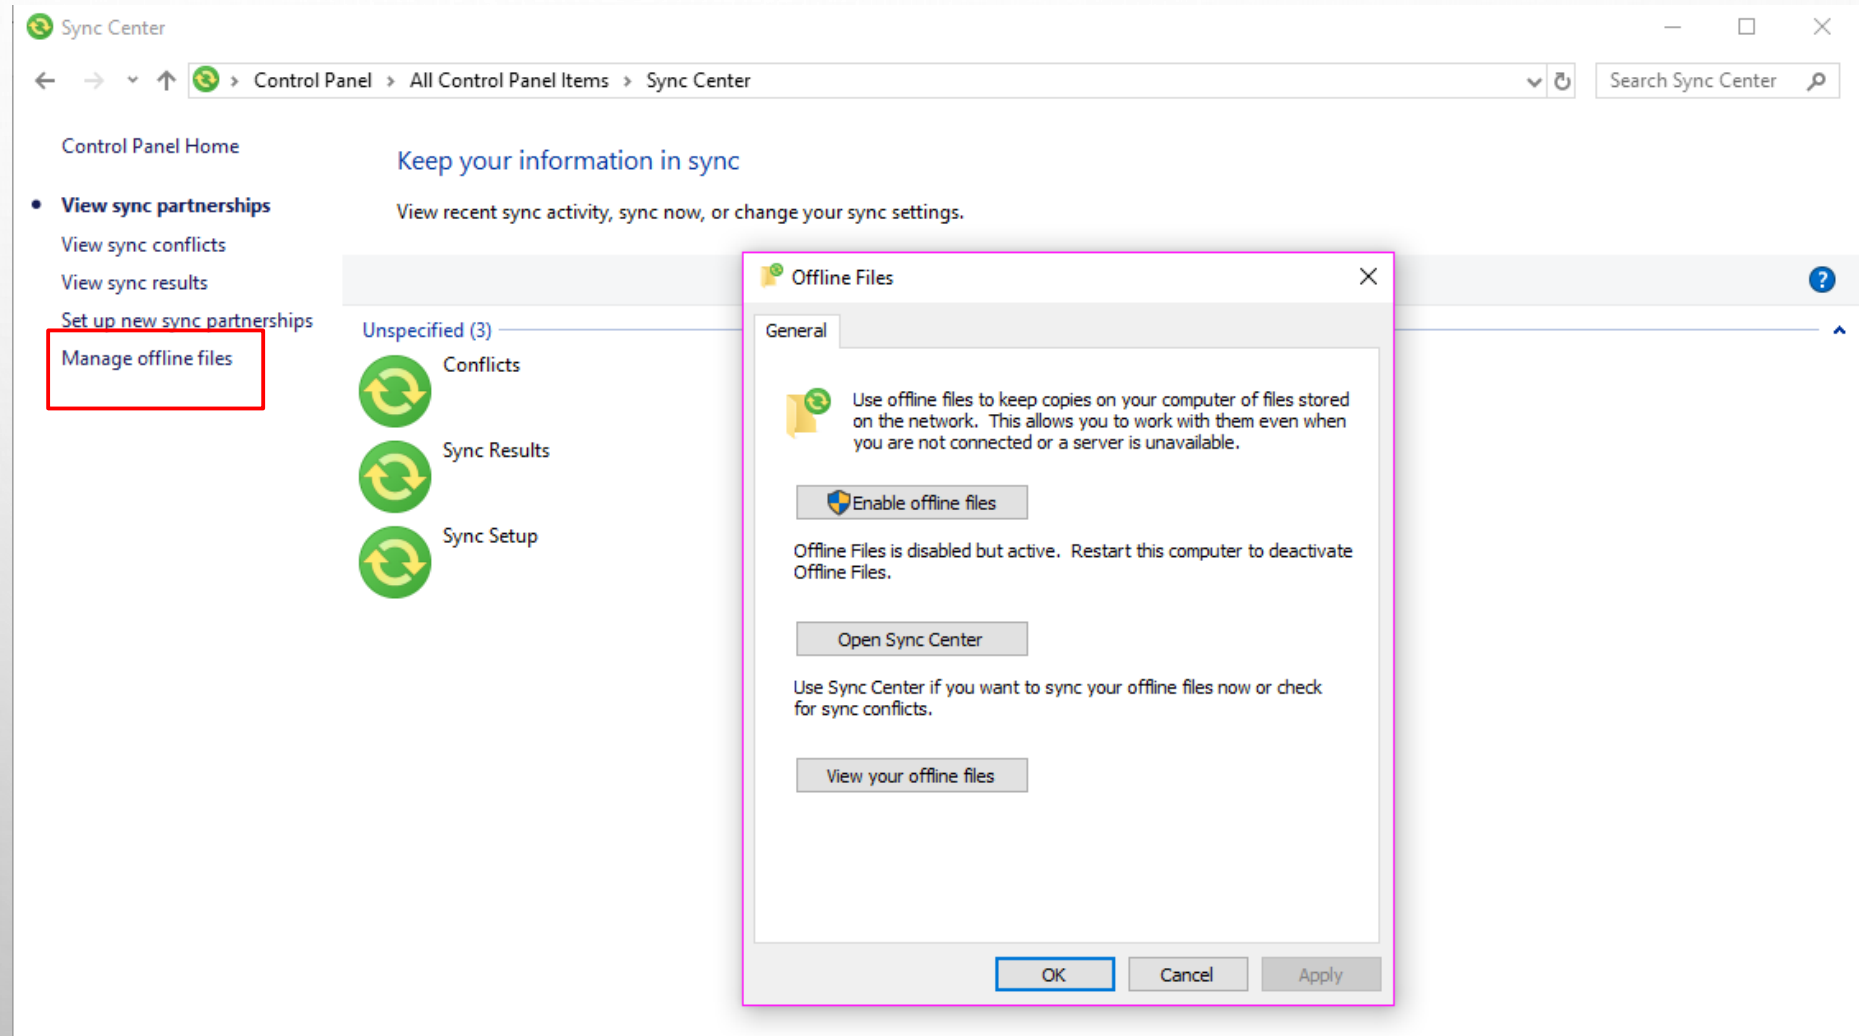

- **PRIVATE NETWORK** - THIS PROFILE SHOULD BE APPLIED TO YOUR HOME NETWORK OR TO THE NETWORK FROM YOUR WORKPLACE. WHEN THIS PROFILE IS ASSIGNED TO A NETWORK CONNECTION, NETWORK DISCOVERY IS TURNED ON, FILE AND PRINTER SHARING ARE TURNED ON AND HOMEGROUP CONNECTIONS ARE ALLOWED.
- **PUBLIC NETWORK** - THIS PROFILE IS ALSO NAMED *GUEST*. IT IS THE MORE SECURE OF THE TWO BECAUSE NETWORK DISCOVERY IS TURNED OFF AS WELL AS FILE AND PRINTER SHARING. THIS PROFILE SHOULD BE USED WHEN CONNECTING TO PUBLIC NETWORKS YOU DON'T TRUST, LIKE THOSE FOUND IN AIRPORTS, COFFEE SHOPS, BARS, HOTELS, ETC.
- THERE'S ALSO A THIRD NETWORK LOCATION PROFILE NAMED *DOMAIN NETWORK*. THIS ONE CANNOT BE SET BY A NORMAL USER. IT IS AVAILABLE FOR ENTERPRISE WORKPLACES AND IT IS SET BY THE NETWORK ADMINISTRATOR.

SETTINGS\NETWORK AND INTERNET

OFFLINE FILES

OFFLINE FILES – FILES STORED IN THE NETWORK WHICH YOU CAN USE IN ANY CASE (EVEN IF THERE IS NO NETWORK CONNECTION) DUE TO THE ACT OF COPYING THESE FILES TO THE LOCAL DISK

ADVANTAGES AND DISADVANTAGES OF THE OFFLINE FILES

- YOU ALWAYS CAN ACCESS THESE FILES, BUT YOU WORK WITH THEIR LOCAL COPIES. FROM TIME TO TIME, THE SYSTEM SYNCHRONIZE YOUR LOCAL VERSION WITH THE NETWORK ONE.
- IF YOU MAKE CHANGES IN THESE FILES IN THE CASE OF NETWORK CONNECTION ABSENCE, THE SAME FILES COULD BE CHANGED WITH ANOTHER USER, THERE WILL BE A SYNCHRONIZATION CONFLICT.
- THERE IS A SPECIAL SYSTEM SNAP-IN “SYNC CENTER” WHICH HELP THE USER TO RESOLVE THESE CONFLICTS.

Conflicts

← → ▾ ↑

Control Panel > All Control Panel Items > Sync Center > Conflicts

Search Conflicts

Control Panel Home

View sync partnerships

• View sync conflicts

View sync results

Set up new sync partnerships

Manage offline files

These items are in conflict and did not sync

Select one or more sync conflicts. Then click Resolve to view the details of each conflict and decide how to resolve them.

Name	Details	Date modified	Partnership
There are currently no sync conflicts.			

ALGORITHM OF WORK WITH OFFLINE FILES

- ALLOW THIS WORKING MODE
- FIND THE NECESSARY FILES (TO BE MADE “OFFLINE”) IN THE “NETWORK” WINDOW
- RECEIVE THEIR CONTEXT MENU (MOUSE RIGHT CLICK ON THEIR ICONS), AND ACTIVATE THE OPTION “ALWAYS AVAILABLE OFFLINE”

PRACTICE

TASK 1: WORK IN FILE SYSTEM NTFS

1. HOW CAN YOU GUESS WHAT FILE SYSTEMS ARE USED IN DIFFERENT PARTITIONS OF YOUR DISK?
2. CREATE 2 FOLDERS: ONE – ON THE DESKTOP, ANOTHER IN THE ROOT DIRECTORY OF THE LOGICAL DISK C:
3. DO ANY PERMISSIONS EXIST? ARE THEY SIMILAR OR DIFFERENT, AND WHY?
4. CREATE FILES IN THESE FOLDERS. WHICH PERMISSIONS THESE FILES RECEIVED? HOW CAN YOU CHANGE THESE PERMISSIONS?
5. IMAGINE THAT THE FOLDER CREATED ON THE DESKTOP CONTAINS INSTRUCTIONS WHICH ARE RECOMMENDED TO BE READ. HOW CAN YOU TRACK THE ACTIONS OF READING THESE INSTRUCTIONS BY ALL THE USERS? COLLECT THE SCREENSHOTS OF ALL THE NECESSARY SNAP-INS.
6. TRY TO COMPRESS ONE OF THE FOLDERS AND ENCRYPT ANOTHER ONE. HOW ARE THEIR ICONS CHANGED? AND WHAT ABOUT COLORS THEIR NAMES ARE VISUALIZED? HOW CAN WE CHANGE THIS SETTING (SHOW ALL FILE/FOLDER NAMES IN THE SAME COLOR)

TASK 1: WORK IN FILE SYSTEM NTFS

7. WHAT FOR DISK QUOTAS ARE USED? SET THE QUOTA OF 200 GB FOR EVERY USER. HOW CAN WE SET PERSONAL QUOTAS (VARIOUS FOR VARIOUS USERS)?

8. CREATE A WORD FILE IN THE FOLDER CREATED IN THE ROOT DIRECTORY, TYPE SOME TEXT INTO IT. CREATE SPECIAL TEXT STREAM WITH THE NAME “TEXT” AND INPUT A KIND OF FILE CONTENT DESCRIPTION INTO IT.

9. PROVE THAT THERE IS THE MAIN CONTENT OF THIS FILE AND A SPECIAL CONTENT DELIVERING DESCRIPTION OF THE FILE

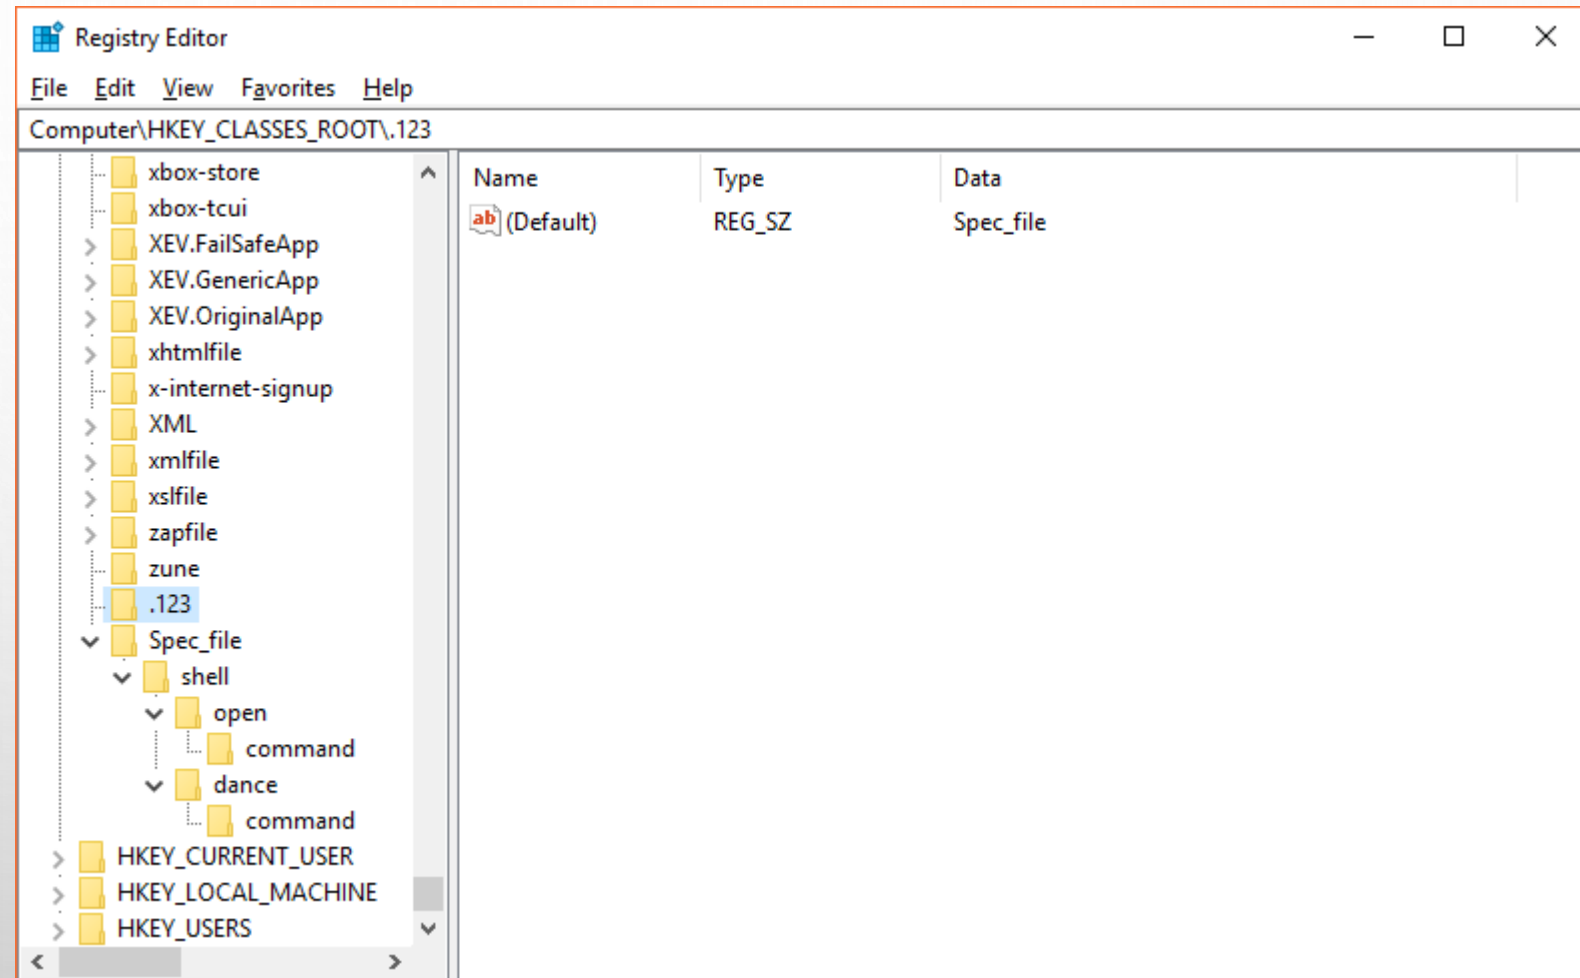

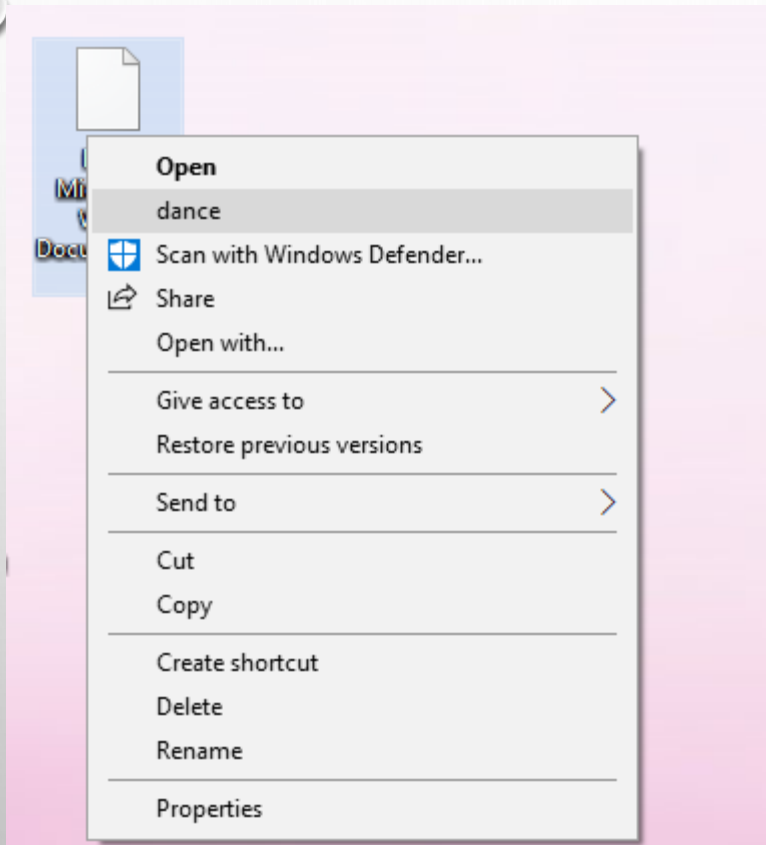

TASK 2: WORK WITH REGISTRY EDITOR

THE GOAL IS TO ORGANIZE THE WORK WITH A FILE WITH THE SPECIFIED EXTENSION

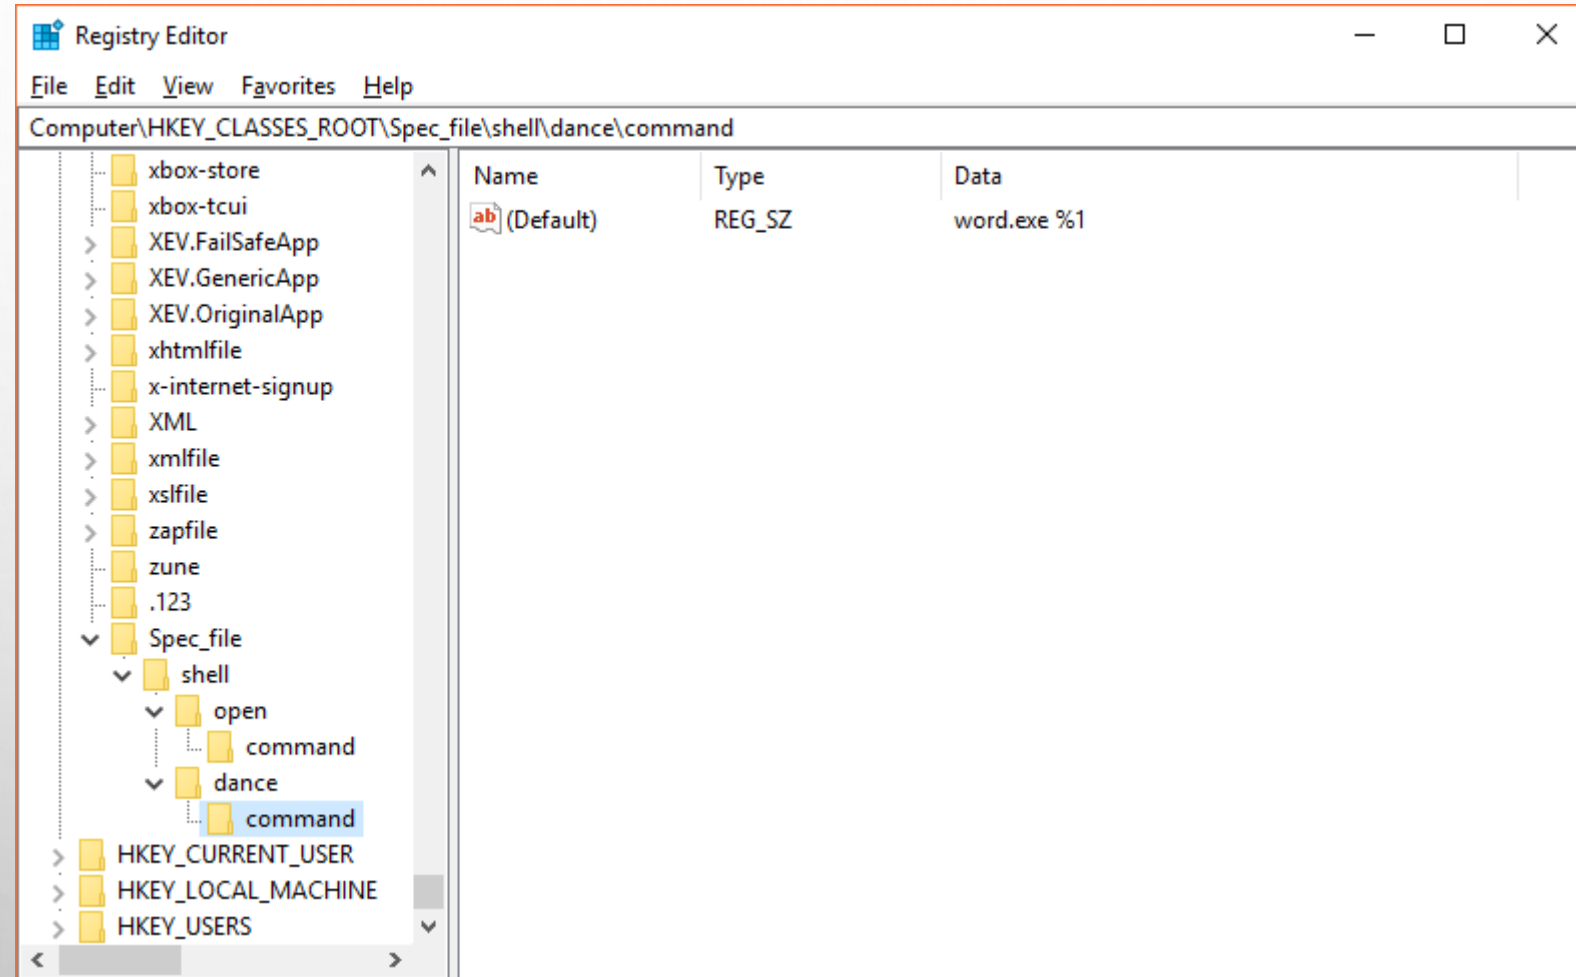

TO ACHIEVE THIS GOAL, IT IS NECESSARY TO DO THE FOLLOWING:

1. UNDER THE MAIN KEY "HKEY_CLASSES_ROOT" CREATE THE KEY WITH THE NAME OF SPECIFIED EXTENSION (.123, FOR EXAMPLE).
2. IN THE "DEFAULT VALUE" OF THIS KEY SPECIFY THE FILE DESCRIPTOR IN ONE WORD (E.G. "SPEC_FILE").
3. CREATE THE SUBKEY UNDER THE KEY "HKEY_CLASSES_ROOT" WITH THE FILE DESCRIPTOR DETERMINED IN THE PREVIOUS STAGE AS THE NAME.
4. UNDER THIS SUBKEY IT IS NECESSARY TO CREATE SUBKEY "SHELL" WITH THE STRUCTURE OF THE COMMANDS WHICH WILL APPEAR IN THE CONTEXT MENU OF ANY FILE WITH THIS EXTENSION.
5. EVERY CONTEXT COMMAND IS SUPPORTED WITH THE KEY OF THE NAME (IT WILL APPEAR IN THE CONTEXT MENU) AND ITS SUBKEY "COMMAND".
6. IN THE VALUE "DEFAULT" OF THE "COMMAND" SUBKEY, IT IS NECESSARY TO TYPE IN A REAL COMMAND (E.G. "NOTEPAD.EXE" %1 – FOR EDITING ANY FILE OF THIS EXTENSION).
7. COMMAND "OPEN" IS OBLIGATORY

TASK 2: WORK WITH REGISTRY EDITOR

TASK 2: WORK WITH REGISTRY EDITOR

TASK 2: WORK WITH REGISTRY EDITOR

- GET TO KNOW THE MAIN FUNCTIONALITY OF REGISTRY EDITOR (PERMISSIONS, AUDIT OF ACCESS TO DIFFERENT KEYS) AND THE STRUCTURE OF .REG FILES
